1. 4th International Research Conference on Science, Health and Medicine 2017 (IRCSHM 2017)

Date: January 4 - 5, 2017

IRCSHM 2017 Conference Proceedings will be peer reviewed by competent reviewers in the field. IRCSHM 2017 provides a leading forum for the presentation of new advances and research results in the fields of Science, Health and Medicine. The conference will bring together leading researchers, academicians, scientists and practitioners in the domain of interest from around the world. IRCSHM 2017 will be co-located with Sixth International Research Conference on Science, Management and Engineering 2017 to have more meaningful interaction with the participants from various parts of the world.

Topics:
- Aerobiology
- Developmental biology
- Mathematical Methods
- Chemical thermodynamics
- Neurology and Neurological Sciences
- Physical Therapy and Rehabilitation
- Family Welfare & Population Education, etc.

Contact Information:
ircshm@gmail.com

2. 2016 International Conference on Medicine Sciences and Bioengineering (ICMSB2016) in Guangzhou, Guangdong, China

Date: October 15-16, 2016

ICMSB 2016 is to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in medicine sciences and bioengineering. It provides opportunities for the delegates to exchange new ideas and application experiences, to establish business or research relations and to find global partners for future collaboration.

Topics:
- Medicine
- Bioinformatics
- Biomedical Engineering, etc.

Contact Information:
ICMSB 2016 Secretary
3. **2017 2nd international conference on Public Health and Medical science in Jinan, China.**

2017 2nd International Conference on Public Health and Medical Sciences (ICPHMS2017) is an optimal platform for academic communications, exchange of ideas and inspirations between specialists and scholars in the fields of biology and life sciences, including hot issues such as environmental health, insurance medicine, medical technology and biomedical sciences. Jinan has a pool of high-quality labor resources. There are 18 universities and colleges in the city where more than 200,000 students are studying. Among the 200+ research institutes in the city, 10 are national laboratories.

**Topics:**

- Insurance Medicine
- Health Education
- Environmental Health
- Occupational Safety and Health
- Immunology
- Pharmacology
- Biomedical Research
- Basic and Clinical Medicine, etc.

**Contact Information:**

**Emails:**
- huiyi123net_may@126.com (For Conference Service/Submission)
- keynotespeaker@126.com (For Keynote Speakers Issues)
- joinconference123@126.com (For Committee Members/Reviewers Issues)

**Cell Phone:** 0086-18917353706 (suggested)

**Telephone:** 021-51098086 ext. 802

4. **iSMIT/DMD-EU 2016 — 28th international conference of the international Society for Medical Innovation and Technology (iSMIT): Delft, Netherlands**

**Date:** 05 Oct 2016 - 08 Oct 2016

The 28th international conference of the international Society for Medical Innovation and Technology (iSMIT) will be held at the prestigious campus of the Delft University of Technology in the historic town of Delft, The Netherlands from 5 - 8 October, 2016. The conference is hosted by the Medical Delta consortium, consisting of the academic medical centers and universities of Leiden, Rotterdam and Delft, and the life sciences industry. Within this thriving open innovation network of medical practitioners and clinical engineers, the 2016 iSMIT conference will be combined with the 4th edition of the Design of Medical Devices - Europe (DMD-EU) conference. The topics for iSMIT/DMD-EU 2016 include, but are not limited to: Advances in Endoscopic Surgery & Gynecology, Computer Aided Planning & Navigation, Endovascular Devices, Exoskeletons and Orthotic Devices, Hand Held Devices, Intelligent Operating Rooms, MR Guided Interventions, Sensors and Medical Robotics, Training and Simulation.
5. **EMBO | EMBL Symposium: Mechanical Forces in Biology: From Force Production to Integrated Roles: Heidelberg, Germany**

**Date:** 12 Jul 2017 - 15 Jul 2017

The symposium aims to unite the field of mechanobiology, by bringing together world-leading experts in the generation and sensing of forces from the molecular scale to the organism scale. An important emphasis will be the combination of physics and computer modelling with molecular genetics and live-imaging in vitro or in vivo. The field is currently expanding rapidly and we aim to provide a comprehensive overview of this progress as well as aiming to capitalise on the opportunities for new collaborations.

**Topics:**
- Mechanosensing
- Morphogenesis
- Modelling

**Contact Information:**
**Email:** events_cco@ocs.embl.org

**Date:** 04 Nov 2017 - 07 Nov 2017

More than 1000 delegates are expected for this international scientific event being organised at Jaipur- " Pink City", India. Medical Physicists, radiological Physics experts, radio-biologists, radiation protection specialists, radiologists, radiotherapists, researchers and students will be participating in this important conference. The topics related to medical/radiological physics, radiobiology, radiation protection, radiation dosimetry etc will be discussed.

**Topics:**
- Physics,
- Radiological Physics, Radiation Protection,
- Radiation Dosimetry,
- Radiotherapy Planning, etc
- Medical

**Contact Information:**

7. **WCPG 2016 — XXIV World Congress of Psychiatric Genetics 2016: Jerusalem, Israel**
The fundamental aim of psychiatric genetics is to identify genes that confer susceptibility to psychiatric disorders and to elucidate the pathway from the gene to the clinical phenotype. A further allied objective is to identify genes that influence response to the drugs used to treat psychiatric disorders and susceptibility to adverse effects. Success holds the tantalizing promise of unraveling hitherto elusive pathophysiological mechanisms and developing new and more effective treatments. Such treatments are urgently needed in a field that has seen few truly novel, clinically proven drugs for several decades. The International Scientific Program Committee of the Jerusalem 2016 meeting will make every effort to insure that the key approaches are represented at the meeting and to achieve a synthesis of knowledge that goes beyond the data presented.

8. **Advances in prostate cancer diagnosis and treatment: London, United Kingdom**

**Date:** 17 Nov 2016  
This event, supporting the Movember Foundation, encompasses both an educational day event aimed at medical professionals and an informal evening session for those interested in the patient experience. Delegates may attend one or both of the sessions. The day will highlight new imaging and therapeutic aspects concerning prostate cancer. It is aimed at radiologists, oncologists, urologists, specialty trainees and radiographers but will also be of interest to junior and senior clinicians interested in prostate cancer.

**Topics:**

- Prostate cancer  
- Oncology  
- Radiotherapy  
- Diagnosis  
- Cancer treatment

9. **WCIRDC — 14th Annual World Congress on Insulin Resistance, Diabetes, and Cardiovascular Disease: Universal City, Los Angeles, CA, United States**

**Date:** 01 Dec 2016 - 03 Dec 2016  
The WCIRDC presents the cutting edge of metabolic research and helps clinicians translate both preclinical and clinical data into their approach to day-to-day clinical practice. The Congress is the premier global
meeting, dedicated to diabetes, obesity, metabolism, and energy balance, linking research to clinical practice, and highlighting our theme --- Exploring New Frontiers in Metabolism --- Tomorrow’s Clinical Science Today. Since its inception, the Congress has become a home to globally recognized clinical and basic scientists and has served as a main stage for them to present their research and share their knowledge in the field of diabetes and cardiovascular disease. The distinguished global faculty, combined with the Congress’ unique bench-to-bedside approach, has culminated in a state-of-the-art program. These expert and creative faculty help promote a new understanding for metabolic diseases.

**Topics:**

- Metabolism
- Insulin Resistance
- Diabetes
- Cardiovascular disease, etc.

**Date:** 09 Feb 2017 - 11 Feb 2017

This course will provide an opportunity for the registrants to analyze cases involving the brain, spine, and head and neck with two of the world’s most renowned experts and leading educators in these fields. Dr. Scott W. Atlas and Dr. Peter M. Som will discuss over 500 selected brain, spine, and head and neck cases in this intensive, personalized tutorial, highlighting their approaches to the differential diagnosis of these diseases. Drs. Atlas and Som will also review pertinent normal anatomy, physiology, pathophysiology, and imaging concepts. The emphasis will be on a clinically oriented imaging approach that helps refine differential diagnosis. This is a unique experience for registrants to personally discuss cases with the authors of the preeminent texts books on Neuroradiology and Head and Neck Imaging.

**Topics:**

- Anatomy
- Physiology
- Path physiology
- Neuroradiology
- Head, neck and brain
- Radiology

11. **IHF Nutrition — Eating the planet & Food for health: Stresa - Milan, Italy**
The goal of this conference is to analyze this key fact and goes on to in detail the importance of various factors correlated with diet to human health. Eating and lifestyles contributes to cause or, as opposed, to prevent the onset of some of the most serious and widespread chronic diseases; greater efficacy prevention make possible to attain better results overall, in part because prevention work to the benefit of a broader share of the population than does medical treatment. Prevention is one of the chief strategic approaches in the effort to ensure the sustainability of health systems burdened by constantly rising levels of investment and operating costs, as seems to be the case in every nation in the world.

**Topics:**
- Nutrition
- Cardiovascular diseases
- Diabetes/metabolic syndrome
- Stroke
- Tumors.

**12. BCANDS 2017 - "From the Outside Looking In..." - Indigenous Disability and Wellness Gathering**

**Date:** 28 Nov 2017 - 30 Nov 2017  
**Location:** Victoria, Canada

The BCANDS 2017 Indigenous Disability and Wellness Gathering seeks to bring together a diverse representation of disability and health related stakeholders over a three day period to learn, inform, share, collaborate and create new and expanded partnerships to assist in addressing the barriers facing Indigenous individuals and families living with a disability. This includes community and organizational leadership, government representatives, individuals and families living with a disability, service providers and others, both Indigenous and non-Indigenous. The BCANDS 2017 Indigenous Disability and Wellness Gathering will be held in Victoria, British Columbia in November 2017, complimenting the 3rd anniversary of the recognition and proclamation of Aboriginal Disability Awareness Month within the province.

**13. ISSP — 14th World Congress of Sport and Exercise Psychology**

**Date:** 10 Jul 2017 - 14 Jul 2017  
**Location:** Seville, Spain

**Topics:** Sport and exercise medicine, physical therapy  
Website: [http://www/issp2017/com](http://www/issp2017/com)

Date: 09 Jul 2017 - 11 Jul 2017

Location: Oxford, United Kingdom

The purpose of the conference is to share knowledge of all those whose interests lie in the nature of human movement. The conference will address issues related to gait, motion, kinesiology, disorders of movement, movement rehabilitation, motion, and balance, movement and cognition, human factors and ergonomics, as well as optimized movement in elite athletes, developmental issues of movement and coordination. Workshops on dance, dance therapy, physiotherapy of movement impairment will also be provided.

Topics: Neurology, Sport and exercise medicine, physical therapy

15. ADI 2017 — 32nd International Conference of Alzheimer's Disease International

Date: 26 Apr 2017 - 29 Apr 2017

Location: Kyoto, Japan

The annual conference of Alzheimer’s Disease International (ADI) continues to evolve and now attracts thousands of dementia specialists from over 100 countries around the world. Hosted with a different Alzheimer association around the world each year, in 2017, the conference will be hosted with Alzheimer’s Association Japan (AAJ). The conference is one of the world’s largest and most important conferences on Alzheimer’s disease and dementia, featuring a range of international keynote speakers and a high standard of scientific and non-scientific content; combined, this makes it the optimum setting to learn about the latest advances in the treatment of dementia.

Topics: Alzheimer's disease, dementia

Website: http://www.adi2017.org
